

I am concerned that the new broadcast service LPFM could have a very negative impact on the local Radio Station. I do not believe that you should change the current FCC rules on this matter. K-LOVE serves my local community. The effect could be devastating if the LPFM stations were allowed to disrupt this service. In this day and time we (including the FCC) need to be doing everything we can to promote Christian family programming, and definitely not doing anything that could possibly hurt this type of programming.
